

ANANYA VIKAS GAWADE

Aspiring Software Engineer

Pune, Maharashtra, India | +91 7666255481 | ananyagawade5@gmail.com

[GitHub / Portfolio](#) | [LinkedIn](#)

PROFILE SUMMARY

Computer Engineering graduate (2027) with a consistently strong academic record (CGPA: 8.325, no current backlogs) and a robust foundation in computer science fundamentals, data structures, algorithms, and object-oriented programming. Demonstrated passion for cutting-edge technology and enterprise software, with hands-on internship experience across full stack development, cloud computing fundamentals, and data-driven problem solving. Proven ability to collaborate in diverse, fast-paced teams, communicate technical work clearly to peers and leadership, and balance multiple concurrent commitments. Proactive, self-motivated, and eager to apply analytical and critical thinking to complex real-world business challenges within a global enterprise technology environment.

SKILLS

Programming Languages: Python, Java, C++, JavaScript

Web Technologies: HTML, CSS, React.js, Spring Boot, RESTful APIs

Database Management: SQL, MySQL, MongoDB, enterprise data integration

Core CS Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), Time & Space Complexity, System Design fundamentals

Cloud & Data: Cloud computing (beginner), data analytics fundamentals, machine learning basics (Python)

Tools & Practices: Git, GitHub, VS Code, Linux, Agile Software Development, debugging, performance optimization

Analytical & Soft Skills: Analytical and critical thinking, problem-solving, written and verbal communication, interpersonal collaboration, adaptability, self-motivation, time management, leadership

Additional: UI/UX design fundamentals (Figma), enterprise/business-context problem solving

EDUCATION

Computer Engineering (B.E./B.Tech) — Pimpri Chinchwad College of Engineering | CGPA: 8.325 | Expected Graduation: [Add Year] | No current backlogs

XII (HSC) — Geetamata Junior College | 84.5% | 2023

X (SSC) — Jnana Prabodhini, Nigdi | 92.8% | 2021

EXPERIENCE

Full Stack Intern / *Sindans Software Solutions* (Jun 2025 – Jul 2025)

- Engineered a hospital file management system using React, improving data retrieval efficiency by ~35%.
- Integrated RESTful APIs with Python and Spring Boot, enabling seamless data exchange across modules.
- Resolved 15+ critical bugs through systematic debugging, enhancing system stability and response time.
- Partnered with cross-functional teams in an Agile setup, accelerating feature delivery by ~20%.
- Investigated emerging tools and technologies to support development of scalable client solutions.

ACADEMIC PROJECTS

FinSight – Intelligent Money Management Platform /

- Developed an AI-powered personal finance platform for expense tracking, budgeting, and savings management.
- Integrated Google Gemini AI for personalized financial insights and recommendations.
- Implemented voice-based transaction entry and ML-based expense prediction.
- Built real-time analytics dashboards with spending trends and cryptocurrency tracking.
- Developed secure authentication, CSV import, and real-time data synchronization features.

FlowPlan – Task Management Application /

- Created a responsive task management platform to organize and track daily activities efficiently.
- Improved application responsiveness and load time, increasing user productivity by ~30%.
- Structured reusable components using clean architecture principles for scalability.

Mira's Studio – Appointment Management System /

- Designed a real-time scheduling platform with REST APIs to streamline appointment workflows.
- Digitized booking operations, cutting manual effort by ~50%.
- Strengthened reliability through optimized data handling and live update features.

Lerno – Learning Management System /

- Developed a scalable LMS to handle course delivery, user management, and progress tracking.
- Architected modular backend services, improving system maintainability by ~35%.
- Enhanced learning experience through structured workflows and efficient data organization.

AI-Based Job Screening System /

- Built an NLP-powered resume screening platform to automate candidate evaluation and ranking.
- Devised preprocessing and scoring mechanisms, boosting screening speed by ~40%.
- Minimized manual filtering by implementing intelligent classification techniques.

LEADERSHIP & COMMUNITY IMPACT

Accounts & Finance Head / MLSC PCCoE (Aug 2025 – Present)

- Directed planning and execution of 5+ technical events and hackathons for 300+ participants, coordinating with cross-functional teams.
- Delivered training sessions and presentations on Web Development, AI, and Data Science, increasing student engagement by ~40%.

Management Team / MLSC PCCoE (Oct 2024 – Apr 2025)

- Coordinated and managed multiple workshops and hackathons, impacting 300+ students through clear communication and planning.
- Supported event logistics and content delivery, improving participation and event efficiency.

INTELLECTUAL PROPERTY & PUBLICATIONS

- Copyright Registration: Obtained copyright protection for an AI-based Crop Price Prediction System designed to forecast agricultural commodity prices using machine learning techniques.
- Medium Blog: Published a technical article explaining how cloud infrastructure and database systems work together to build scalable applications.

ACHIEVEMENTS & CERTIFICATIONS

- Figma UI/UX Design Essentials
- Python for Data Science, NPTEL — Elite Score: 73%
- Machine Learning using Python, Udemy
- Mastering Data Structures & Algorithms in C++, Udemy
- Java Masterclass 2025, Udemy
